# TechMart Multivendor System

'What is TechMart?'

TechMart uses the world's strongest and awarded CMS, i.e. Joomla with the most powerful e-Commerce extension Virtue-Mart.

TechMart is an online system which shifts the technology from the Online Store to World's First "Online Mart". The system not only allows you, but also third party vendors, wholesalers, manufacturers, etc. directly to sell products or services.

Features

TechMart is an e-commerce multi-vendor solution designed as an extension as Joomla!content management systems (CMS). TechMart is written in PHP and requires the MySQL database environment for storage. It is best suited for low to medium level traffic web-sites.

Basic Functionalities

- **Multiple Vendors, Single Shop:**
  Multiple vendors are a One Window Online Mall to shop products from different vendors/manufacturers.

- **Live Ordering:**
  Live ordering system is for live order method for CSRs; it is having multiple options including sticky notes for paper free environments, late orders blink etc.

- **Vendor Filtration:**
  Multiple types of filtrations I.e. Self-Deliverables, & Admin Deliverables are included in the system that allows the related privileged person to handle accordingly. Vendor may filter via minimum delivery or categories and also it can be sorted according to the minimum order. Products can be sorted also for minimum order.

- **Report:**
  TechMart offers reports on Vendor side & Admin Side both. I.e. Revenue reports, order reports, vendor wise reports.
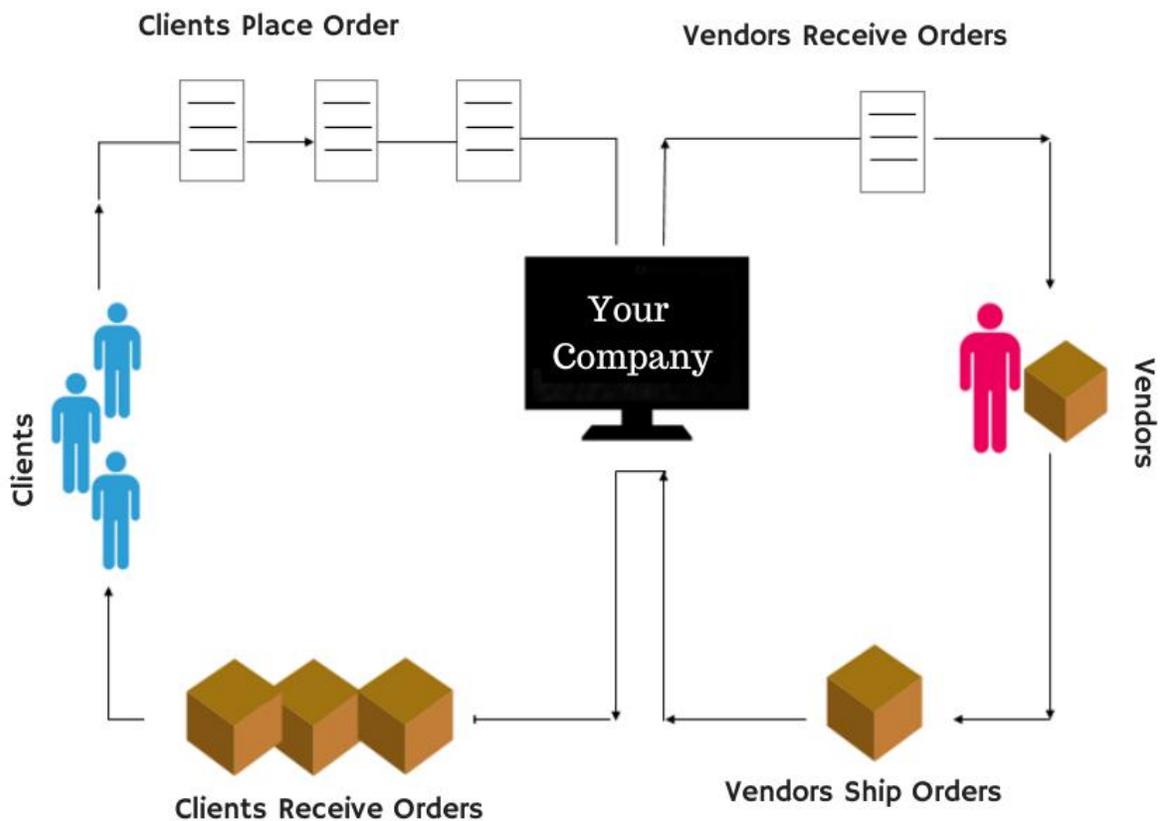

- **Inventory:**
  TechMart uses Virtue Mart which awarded Inventory system that extend it to filter via vendor as well.

Description

TechMart supports an unlimited number of products and categories, with products able to be assigned to multiple categories. TechMart supports multiple prices for a single product, based around shopper groups or a quantity range, and permits the use of a variety of different payment gateways.

New to TechMart

Notably new to TechMart was the inclusion of the ability to quickly change themes for category, product, checkout and cart pages. The cart is also integrated with Rapid 3.0, which enables transaction data to be sent directly from the customer's browser to the payment gateway without passing through the merchant's systems.
